Hyderabad, India | +91 6295796976 | sayanash335@gmail.com | [LinkedIn](#)

PROFESSIONAL SUMMARY

B.Sc. Cyber Security graduate with hands-on, lab-based experience in network troubleshooting, vulnerability assessment, and system administration across Windows and Linux environments. Skilled in TCP/IP networking, Python and SQL scripting, and security tools including Nmap, Wireshark, and Burp Suite. Seeking an entry-level IT Support, Network Administration, or Cyber Security Analyst role to apply strong troubleshooting, analytical, and problem-solving skills.

TECHNICAL SKILLS

Programming & Scripting: Python, Java, SQL, HTML, CSS, PowerShell

Networking: TCP/IP, DNS, DHCP, HTTP/HTTPS, Routing & Switching, Network Troubleshooting, LAN/WAN, VPN.

Operating Systems: Windows 10/11, Windows Server (basics), Kali Linux, Ubuntu, VirtualBox

Security Tools: Nmap, Wireshark, Burp Suite, OWASP ZAP, Nessus, SQL Injection & XSS Testing

IT Support Skills: Hardware/Software Troubleshooting, System Configuration, User Account Management

Soft Skills: Problem Solving, Communication, Teamwork, Time Management, Quick Learning

WORK EXPERIENCE

Cyber Security Trainee — Institute of Advanced Learning and Skill Development (IALSD)

- Conducted vulnerability assessments on lab systems using Nessus and OWASP ZAP, documenting findings against CVE reports.
- Performed network scanning and host discovery using Nmap to identify open ports and services.
- Tested web applications for SQL Injection and Cross-Site Scripting (XSS) vulnerabilities using Burp Suite in controlled lab environments.
- Reviewed penetration testing methodologies and applied basic remediation recommendations.

PROJECT

Intelligent Web Application Firewall (WAF)

- Designed and developed a Web Application Firewall to detect and block SQL Injection and XSS attack patterns in real time.
- Implemented rate limiting and request filtering to reduce malicious traffic and prevent abuse.
- Built an attack logging and monitoring dashboard to track flagged requests and traffic patterns.
- Improved overall web application security posture through adaptive, rule-based traffic filtering.

PRACTICAL / HANDS-ON EXPERIENCE

- Configured and managed virtual machines using VirtualBox for isolated testing environments.
- Performed vulnerability scans on test systems and interpreted scan reports.
- Practiced Linux system administration and basic security hardening on Ubuntu and Kali Linux.
- Conducted network traffic analysis using Wireshark to identify anomalies.
- Tested web applications for common vulnerabilities in sandboxed lab environments.

EDUCATION

B.Sc. in Cyber Security — NSHM Knowledge Campus, Kolkata

2023 – 2026

Higher Secondary (Science) — Harimara Konarpur SSC High School

2023

CERTIFICATIONS

- Google Cybersecurity Professional Certificate — Google / Coursera
- Cisco Networking / Packet Tracer Certification — Cisco Networking Academy
- Cyber Security Job Simulation — Deloitte (via Forage)
